IMRAN HAKIM

Compliance Analytics Officer

Malaysia | imran.hakim@example.test

PROFESSIONAL SUMMARY

Compliance analytics officer with four years of synthetic experience assembling review evidence, validating control reports and investigating operational exceptions. Uses SQL and spreadsheets to make review populations traceable and understandable. Communicates findings carefully, distinguishes observed exceptions from conclusions and refers policy interpretation to authorised reviewers. Interested in work that combines analytical discipline with transparent, human-led oversight.

CORE SKILLS

Risk compliance; SQL; Excel; spreadsheet analysis; data visualisation; AI literacy; responsible AI; audit evidence; control testing.

PROFESSIONAL EXPERIENCE

Compliance Analytics Officer **2022 – Present**

Bayu Demo Assurance Services | Fictional employer, Malaysia

- Prepared risk compliance review populations with SQL, recording selection rules, reporting dates and excluded records; reconciled counts to source extracts and retained the query version so another reviewer could reproduce the working population.
- Maintained Excel control-testing registers with evidence references, reviewer assignments and due dates; checked that exceptions had an accountable owner and supporting documentation before including them in the monthly review summary.
- Created data visualisation summaries of unresolved findings and review ageing, clearly distinguishing open items from confirmed control failures; discussed unusual patterns with operational teams and recorded their explanations for subsequent independent review.
- Supported responsible AI awareness sessions by preparing fabricated examples of missing evidence and misleading summaries; explained AI literacy principles, source verification and the need for an authorised person to make final compliance judgments.

Operations Support Associate **2020 – 2022**

Angsana Practice Administration | Fictional employer, Malaysia

- Maintained working registers, checked supporting documents and prepared clear handover notes for colleagues. Followed documented procedures, asked for clarification when evidence was incomplete and escalated unresolved requests to the appropriate supervisor.
- Supported team reporting by organising source files, checking basic totals and recording changes in a shared issue log. Helped new colleagues understand the checklist and documented recurring questions for the next process review.

SELECTED PROJECT

Built a mock control-review dashboard using fabricated service records, a SQL selection query and a spreadsheet evidence index. Added checks for duplicate case identifiers and incomplete review notes. Presented a short findings paper describing observed exceptions, data limitations and recommended follow-up questions without claiming a legal or audit conclusion.

EDUCATION

Bachelor of Business Analytics 2017 – 2020

Demonstration College of Governance Studies | Fictional institution, Malaysia
