MEERA ANAND

Logistics Supervisor

Malaysia | meera.anand@example.test

PROFESSIONAL SUMMARY

Logistics supervisor with five years of synthetic experience coordinating warehouse handovers, dispatch priorities and inventory checks. Uses practical logistics planning and clear communication to keep daily activities visible to the team. Experienced in investigating stock discrepancies, maintaining spreadsheet trackers and documenting routine processes. Seeking a supervisory role with responsibility for dependable fulfilment and continuous operational learning.

CORE SKILLS

Logistics planning; Excel; spreadsheet analysis; process mapping; customer service; inventory reconciliation; shift coordination.

PROFESSIONAL EXPERIENCE

Logistics Supervisor **2022 – Present**

Lintang Demo Distribution | Fictional employer, Malaysia

- Coordinated daily dispatch priorities across a practice warehouse team, balancing vehicle capacity, delivery windows and available stock; maintained a logistics planning register and escalated constraints before the agreed handover deadline.
- Reconciled cycle-count results in Excel, compared physical counts with movement records and assigned follow-up checks for discrepancies; documented findings without overwriting the original count so supervisors could review the evidence trail.
- Led process mapping sessions for receiving, picking and dispatch handovers; recorded decision points, required documents and exception routes, then tested the draft instructions with a colleague unfamiliar with the workflow.
- Worked with customer service colleagues to investigate delayed orders, communicate revised expectations and record root causes; prepared shift handover notes covering unresolved shipments, equipment availability and the next responsible operator.

Operations Support Associate **2020 – 2022**

Seroja Practice Supply | Fictional employer, Malaysia

- Maintained working registers, checked supporting documents and prepared clear handover notes for colleagues. Followed documented procedures, asked for clarification when evidence was incomplete and escalated unresolved requests to the appropriate supervisor.
- Supported team reporting by organising source files, checking basic totals and recording changes in a shared issue log. Helped new colleagues understand the checklist and documented recurring questions for the next process review.

SELECTED PROJECT

Designed a fabricated dispatch planning exercise covering late inbound stock, limited vehicle capacity and urgent customer requests. Compared alternative schedules in a spreadsheet and documented the assumptions behind each choice. Presented a process map and a handover checklist that made outstanding exceptions visible to the next shift.

EDUCATION

Diploma in Logistics Management 2017 – 2020

Demonstration College of Supply Operations | Fictional institution, Malaysia
